

Design brief

If you do not have a portfolio you are required to respond to this design brief.

Part 1

Draw an object in your home or a simple interior space. The object may be a shoe, a plant, a piece of furniture etc.

Part 2

You have been approached by a young doctor who works at your local hospital to come up with a scheme for her new apartment. It is a single story space with a mezzanine for sleeping. Your client would like you to put together a single A3 vision board (physical or digital) which may include a colour scheme, and images of furniture/ furnishings and art.

She is an eccentric character so would like you to select a couple of pieces that reflect her love of colour and art. (reference image on the right).
